Office Action Summary		10/536,924		BUCHHAUSER ET AL.				
		Examiner		Art Unit				
		Rick K. Chang		3726				
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1)☑	Pasnonsive to communication(s) filed on 08 De	ecember 2000						
· · · · · · · · · · · · · · · · · · ·	Responsive to communication(s) filed on <u>08 December 2009</u> . This action is FINAL . 2b) This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4, last to second line: It is unclear what is "a tube profile" is referring.

Claims are ambiguous and competitors would be unable to discern the bounds of the invention.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Bruyn et al (US 4,899,712) in view of Vennemeyer et al (US 6,705,083) and Holbrook et al (US 4,470,188).

Re claim 4: Bruyn discloses producing the high-pressure fuel accumulator for a fuel injection system of an internal combustion engine (title and abstract) by forming a tubular base body together with at least one fuel supply port for a fuel supply, at least one fuel discharge port for a fuel discharge, and at least one fixing element as a one-piece integral component (col. 4,

lines 6-11), and forming the tubular base body with at least one connector strip and/or one fixing strip (8a), except for profile-extruding the tubular base body and hardening a surface of the high-pressure fuel accumulator by cold working the one-piece integral component; wherein the cold working step includes redrawing a tube profile through a second extruding die slightly smaller than a first extruding die.

Vennemeyer discloses profile-extruding the tubular base body (col. 2, lines 34-37).

Holbrook discloses hardening a surface of a metal by cold working, wherein the cold working step includes redrawing a tube profile through a second extruding die slightly smaller than a first extruding die (Fig. 4).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Bruyn by profile-extruding the tubular base body and hardening a surface of the high-pressure fuel accumulator by cold working the one-piece integral component, as taught by Vennemeyer and Holbrook, for the purpose of not welding the connector strip and/or one fixing strip and further relax the extrudant as well as reducing the diameter.

Re claim 6: Bruyn discloses performing at least one of the following two steps: removing superfluous material from the connector strip and leaving individual connecting pieces in place (col. 4, line 29).

Response to Arguments

- 5. Applicant's arguments filed have been fully considered but they are not persuasive.
 - Fig. 5 fails to show two size holes and a pipe is being drawn through dies.
 - Bruyn discloses extruding in col. 2, line 53.

Application/Control Number: 10/536,924

Art Unit: 3726

Both an injector and a master cylinder are used in automobiles. "the analysis need not seek out precise teaching directed to the specific subject matter of the claim, for a claim can take account of the inferences and creative steps that a person of ordinary skill in the art would employ." Id. "If a technique has been used to improve one device, and a person or ordinary skill in the art would recognize that it would improve similar devices in the same way, using the technique is obvious unless its actual application is beyond his or her skill." Id. at 417. "When there is design need or market pressure to solve a problem and there are a finite number of identified, predictable solutions, a person of ordinary skill as a good reason to pursue the known options within his or her technical grasp. If this leads to the anticipated success, it is likely the product is not of innovation but of ordinary skill and common sense. In that instance the fact that a combination was obvious to try might show it was obvious under 35 U.S.C. 103." KSR Int'l Co. v. Teleflex Inc., 127 S. Ct. 1727, 1742, 82 USPQ2d 1385, 1396 (2007). Therefore, it would have been obvious to rotate the differential case during said steps (c) and (d) in order to ensure proper setting of said differential bearings while said predetermined preload force is applied.

Interviews After Final

6. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

Conclusion

- 7. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.
- 8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Rick K. Chang whose telephone number is (571) 272-4564. The

examiner can normally be reached on 5:30 AM to 1:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David P. Bryant can be reached on (571) 272-4526. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
